

Data manifold geometry vs. active subspace alignment
Imagenette (500 images, GAP representations) — trained vs. random-init control

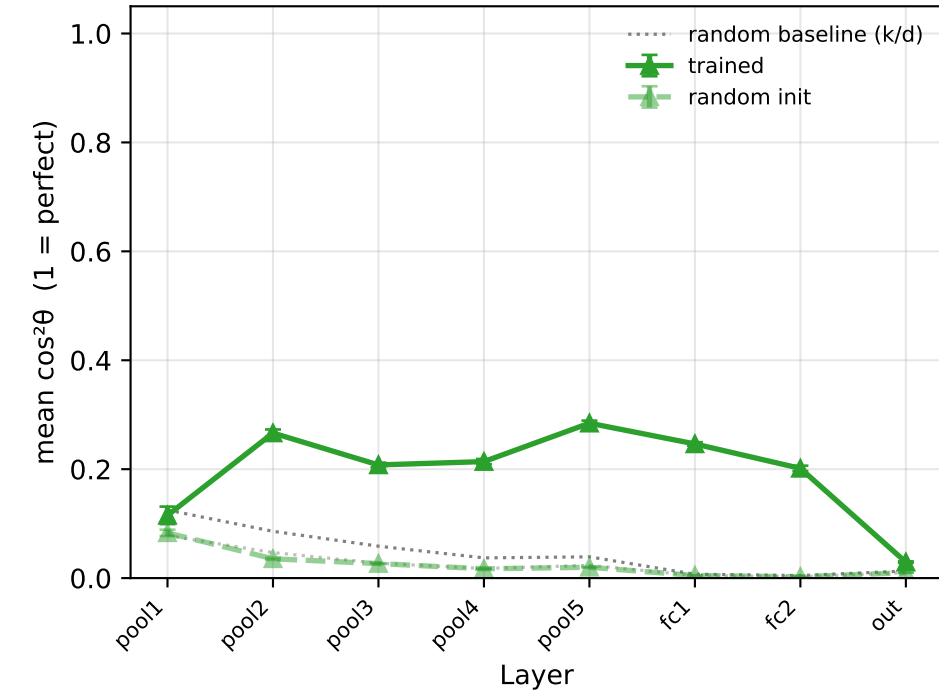

VGG-16 — intrinsic dimension

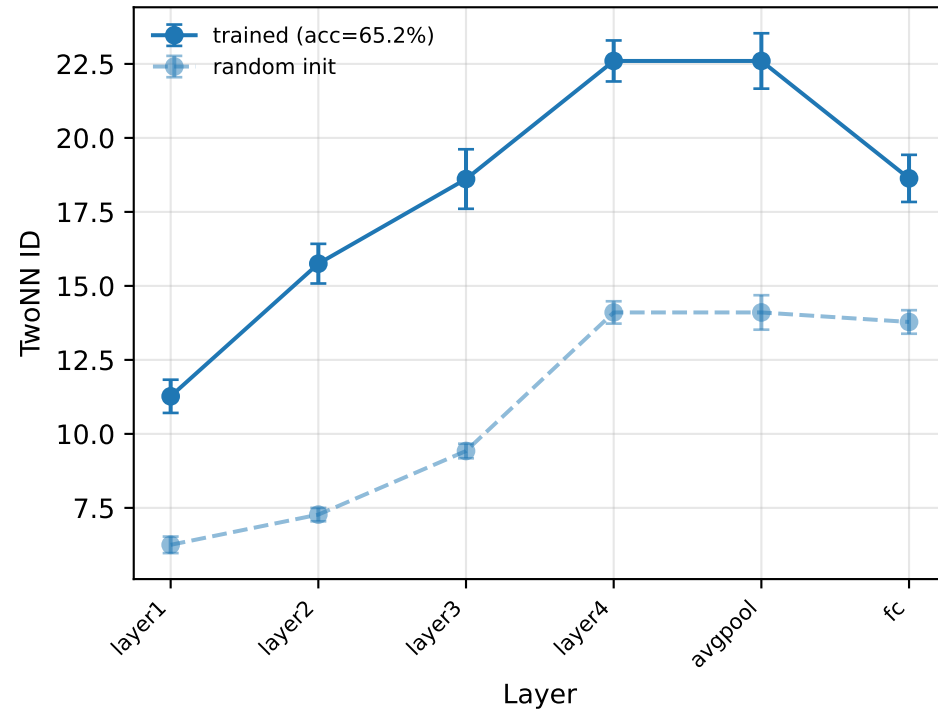

VGG-16 — active subspace size
(band: 5%-0.1% thresholds)

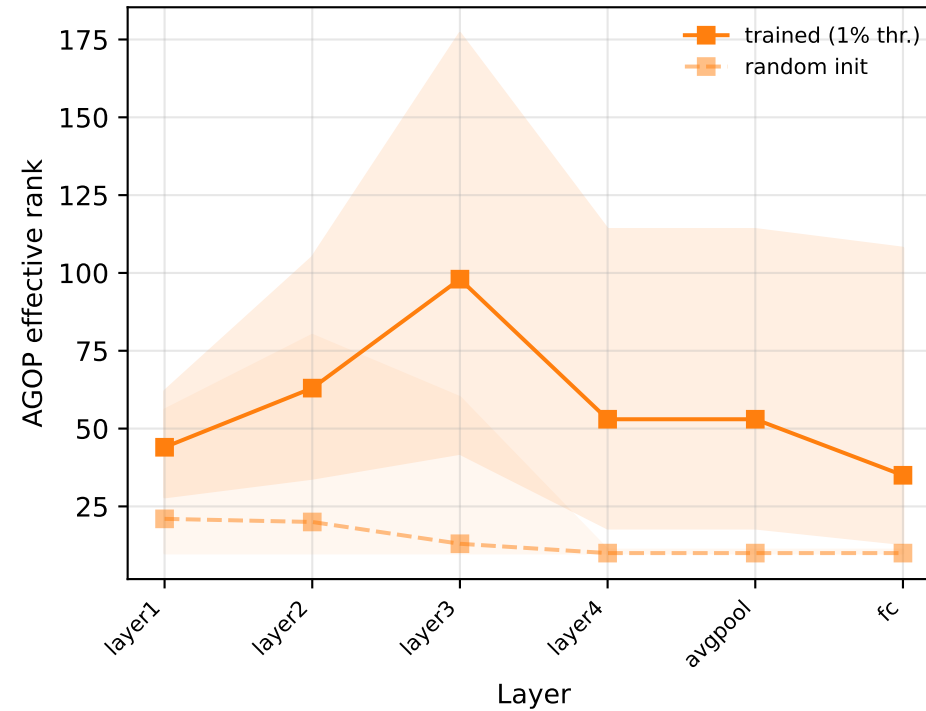

VGG-16 — PCA vs AGOP alignment

ResNet-18 — intrinsic dimension

ResNet-18 — active subspace size
(band: 5%-0.1% thresholds)

ResNet-18 — PCA vs AGOP alignment
